

AREF Event 'Disruptors in the Industry'

The property sector is evolving with the emergence of disruptors such as 'proptech' changing the way we do business. AREF's latest event brings together three leading innovators discussing how they are disrupting the industry.

We will hear from the founder of Property Innovation Labs (Pi Labs), Europe's first property tech venture capital firm; from BrickVest, on crowdfunding for institutional grade property investment and the advantages that blockchain can bring to the market; and from WeWork, the global company capitalising on the flexible working trend, which since it began 7 years ago is now valued at £17bn with more than 170 locations over 40 cities in the world.

Confirmed speakers/panellists:

Emmanuel Lumineau, Founder and CEO of BrickVest

Patrick Nelson, Executive VP of Real Estate, WeWork

Faisal Butt, Founder and Chairman of PiLabs

Nick Mansley, Executive Director of the Cambridge Real Estate Research Centre

Tuesday 6th March 2018

Registration & Breakfast 08:30 | Start 09:00 | Networking 10.30
